

# LITHIUM ION BATTERIES CAN CAUSE FIRES

Please Recycle Properly.

## WHAT IS THE PROBLEM?

Lithium batteries cannot be recycled like paper, plastic, and glass. They cause fires in recycling facilities.

## WHAT ARE LITHIUM BATTERIES?

Lithium batteries power many wireless devices, including laptops, cellphones, Bluetooth headphones, power tools, and games/toys.

## WHAT IS THE SOLUTION?

Lithium batteries need to be recycled separately from other waste material. Home improvement stores often accept lithium batteries for recycling.

Please also check with your local government for other recycling options.
