

**SAFETY**

**MONDAY**

## Inadequate Surveillance (Look and See)

**Inadequate surveillance occurs when the driver is in a situation where he/she is required to look to safely complete a maneuver and either fails to look in the appropriate place or looks, but does not see.**

### When servicing containers on a roadway...

- ✓ The left side of your truck is "fluid", meaning constantly changing (cars, bikes, etc.).
- ✓ The right is limited to more "fixed" objects (mailboxes, basketball hoops, parked cars).

### Before pulling forward to the next container

- ✓ Look...Direct your eyes at the appropriate mirror(s)/camera(s)
- ✓ See...Become aware of what you are looking at

### When Driving on a roadway... Before performing a maneuver (lane change, merge or turn)

- ✓ Look...Direct your eyes at the appropriate mirror(s)/camera(s)
- ✓ See...Become aware of what you are looking at

**Give your brain time to make sense of what you are seeing**
