

# Construction & Demolition Recycling Facility of the Year Award

This award is open to new or existing construction and demolition (C&D) recycling facilities that are either NWRA members or public sector non-profits that have embraced waste prevention and careful use or reuse of resources. It is intended to recognize a facility as a model for construction and demolition waste diversion, as well as for instilling a culture of waste prevention and responsibility among employees. Applicants would be asked to describe methodologies and provide data to quantify the impact of their efforts.

**Nomination Payment Information - \$150**

**How to Enter** - Submit documents by **July 1, 2023**.

**Questions? Please contact Anne Germain, [agermain@wasterecycling.org](mailto:agermain@wasterecycling.org)**

## **Nominating Guidelines**

C&D Recycling Facility of the Year nominations will be considered by NWRA's Recycling Committee based upon the specific examples of how this program improved recycling.

For the award, please submit the following information in a single PDF or zip file. Please do not exceed 20 pages including all photos, figures, and attachments.

## **Applicant Information**

Please provide contact info for the award – this is the person that prepares the award and deals with the administration of the application.

Please provide information about people that are responsible for the nominated C&D recycling facility.

## **Facility's Qualifying Criteria**

NWRA's Recycling Committee will evaluate award applications based on how the C&D Recycling Facility of the Year impacts recycling.

Provide a narrative giving background on the recycling facility. In the narrative, include details about the siting, design, size and capacity of the facility. Discuss the facility's goals, materials accepted, sustainability measures, and how it works to achieve them. Discuss measurable results. Data can be presented in the narrative or through charts and graphs.

A picture is worth a thousand words. Please include color photographs, drawings, or schematics to illustrate the innovation.

Additional information: Please add any additional information including letters of recommendations, copies of brochures and print ads, links to videos etc.

Discuss any awards, honors or recognition already received.
