SAFETY

MONDAY

AVOID SLIPS, TRIPS AND FALLS

According to OSHA, more than 65 percent of falls in the workplace were caused by a slip or trip.

In 2020, the Bureau of Labor Statistics reported 805 workers died in falls, and 211,640 workers were injured badly enough to require days off work.

To prevent slips, trips, and falls, please follow these best practices:

- ✓ Wear proper footwear with the appropriate tread, as it is one of the simplest ways to avoid slips.
- ✓ Always use 3 points of contact when entering or exiting your truck.
- ✓ Use caution when stepping out of your truck, keep steps clean and free of debris.
- ✓ Pay attention to the ground when stepping out of your truck; remember the ground conditions at the landfill can be unpredictable.
- ✓ Be aware that transfer station ground may be wet and full of hazards.
