

LITHIUM BATTERY

RESOURCES/ SAFETY

- **Lithium batteries are dangerous if placed in regular waste & recycling streams** - they should never be placed in regular waste & recycling bins.
- **Do not remove any lithium battery that is not intended to be replaceable** such as in cell phones, vaping devices or laptops. By forcing the removal of a battery, an explosion or fire can start.

Best Disposal Practices:

- [call2recycle.org](https://www.call2recycle.org) offers guidance on how and where to recycle products
- [search.earth911.com](https://www.search.earth911.com) offers shipping options and community locations
- Contact your local government or hardware store(s) for best local options
