

LITHIUM BATTERIES RESOURCES/SAFETY

Lithium batteries are dangerous if placed in regular waste & recycling streams - they should never be placed in regular waste & recycling bins.

Do not remove any lithium battery that is not intended to be replaceable such as in cellphones, vaping devices or laptops. By forcing the removal of a battery, an explosion or fire can start.

Use The Following Resources For Proper Disposal Of Lithium Batteries:

- call2recycle.org
- search.earthg11.com
- Contact your local government or hardware store(s)
